## Full cleaning guide

The felt parts are extremely durable and require little attention to maintain in adequate appearance. Light dusting on a regular basis will prevent dust build-up and most marks can be cleaned with a mild detergent solution followed by rinsing and blotting. Stains should be dealt with according to the chart below.

- Be sure to unplug the product.
- Before carrying out a proposed cleaning method, apply to a concealed section to ensure it will not affect the product or adhesive. Avoid cleaning methods that create severe visible abrasion.
- Solvent and mineral based cleaners should be used sparingly to avoid possible degradation of the adhesive adhering the felt to the product.

### Soft felt surfaces

Type of stain	Treatment
• Dust, Dirt	<b>Vacuum → J or C</b>
• Shoe polish	<b>B → C → D</b>
• Grease, Oil, Sauces, Chocolate	<b>B → D → C</b>
• Chewing gum	<b>I → B → D → C</b>
• Wine, Blood	<b>A → Add salt → C</b>
• Drinks	<b>A → C</b>
• Milk	<b>A → E</b>
• Mud	<b>B → C</b>
• Vomit, Urine	<b>A → C → D</b>
• Paint (water based)	<b>A → F → C</b>
• Paint (oil based)	<b>A → H → D → C</b>
• Crayon/Colour Marker	<b>B → D → C</b>
• Ink (ballpoint)	<b>D → E</b>
• Ink (fountain)	<b>A → C</b>
• Burn/Scorch Mark	<b>J</b>

### Treatment description

- A** Absorb excess as soon as possible with a sponge or cloth.
- B** Remove surplus with a thin blunt edge or appropriate instrument.
- C** Sponge with a solution of carpet shampoo working from well outside the stain in a circular motion towards the centre (this avoids spreading the stain). Sponge afterwards with clean warm water and mop excess moisture with a clean dry cloth or sponge. Allow to dry, then brush gently with a soft brush. If stains remain, sponge with a solution of one part household bleach to six parts clear water. Thoroughly rinse after treatment.
- D** Lightly sponge with a household dry cleaning fluid and blot. Apply sparingly, as the substance may have an adverse effect on the adhesive.
- E** Sponge with methylated spirits and blot dry.
- F** Lubricate the stain with glycerine or petroleum jelly.
- G** Apply nail polish remover. The nail polish remover should not include lanolin or be of a greasy nature.
- H** Sponge with turpentine (or substitute)
- I** Freeze with ice cubes and scrape away while cold
- J** Has to be replaced.

- Be sure to unplug the product.
- For the hard surfaces, it should be sufficient to clean with a damp piece of cloth or soft sponge.
- Vacuuming is fine to remove dust and dirt.

### Hard surfaces (plastic parts)

- Damp piece of cloth or soft sponge
- Vacuum
